N. P. N. SEMI-ANNUAL INDEX

Of Technical and Semi-Technical Refinery Articles

July-December, 1934

Asphalt, Road Oils, Road Materials

Title	Issue	Page
Types of Road Oils, and their Use in Road Building, by H. M. Milburn and J. T. Pauls	July 11,	28
Liquid Asphaltic Materials and Their Use in Road Building, by H. M. Milburn and J. T. Pauls	July 25,	22
Asphalt Institute Issues Road Specifications	Aug. 22,	60

Cracking

Title	Issue	Page
Development of Alloy Steels for Oil Refinery Service, by W. H. Wiewel and R. L. Wilson	Aug. 1,	17
"Creep" Study of Metals in Refining to be Enlarged	Aug. 8,	8
Wasatch Combines Reforming with Skimming in Utah Refinery	Sept. 5,	22
Application of Pearlitic Alloy Steels to Specific Refinery Problems, by A. E. White, C. L. Clark, R. L. Wilson	Nov. 7,	31
No. 1 Cracked Furnace Oil Cited as Best Fuel for Tractors	Nov. 21,	36
Dubbs Unit Turns Sunray's Unsalable Waxy Gas Oil Into Premium Products, by F. L. Martin, C. H. Alberding, and Bernard J. Flock	Dec. 5,	31
Three Charging Stocks Cracked in Dubbs Unit in Continuous Operation, by Gustav Egloff and Edwin F. Nelson	Dec. 26,	22

Detonation, Knock Rating and Knock Testing

Title	Issue	Page
Knock Tests Conducted by Forty Technologists	July 18,	19
Aviation Gasoline Knock Ratings (Progress Report of S. A. E.)	July 18,	36
3000 Climbs to Test Knocking Made on Uniontown Hill	Aug. 1,	15
Uniontown Road Tests Show More Powerful Cars, and Better Motor Fuels	Aug. 15,	5
Ignition Temperatures of Gasoline Studied	Aug. 22,	36
Seven New Features in 50,000-Mile Uniontown Anti-knock Tests	Sept. 5,	18
The CO/H_2 Ratio in the Products of Combustion from Automotive Engines, by G. W. Gleeson and W. H. Paul	Sept. 12,	32
Knocking Traits of 100 Pure Hydrocarbons Determined	Sept. 19,	28-F
More Work on Knock Tests Advocated at A.P.I. Refining Sessions	Nov. 21,	27

Diesel Fuels and Engines

Title	Issue	Page
Fuels and Cylinder Wear Studied at High Speed Diesel Meet	July 4,	20
Simplified Diesel Fuel Performance Index Proposed	July 25,	36
Automotive Diesel Outlook is Favorable	Nov. 14,	36
Viscosity and Gravity Found to Show Diesel Fuel Ignition Traits	Nov. 21,	30
No. 1 Cracked Furnace Oil Cited as Best Fuel for Tractors	Nov. 21,	36
Refiner and Engine Builder Must Solve Diesel Fuel Problem, by T. B. Rendel	Dec. 12,	21
Relation of Diesel Performance to Oil Spray Variations Shown	Dec. 19,	37

Distillation

Title	Issue	Page
New Distillation System Tested by Valvoline	Aug. 1,	22
Small Scale Fractionating Equipment	Sept. 19,	28-F
Case School Builds Bubble Column for Fractionation Research	Sept. 26,	26
Fractionation Efficiency in Gasoline Plant	Oct. 10,	32
Refinery Gases Analyzed by Distillation	Nov. 7,	56

Hydrogenation

Title	Issue	Page
Hydrogenated Solvents for Paint	Nov. 28,	24

Lubricants and Lubrication

Title	Issue	Page
Use of Light Winter Oils Proves their Economy, Safety, Efficiency, by W. H. Graves, H. C. Mougey, and E. W. Upham	July 4,	20
Solvent Extraction Costs Lower on Mid-Continent Lubes than Conventional Processes, by R. E. Wilson and P. C. Keith	July 18,	20-D
Chlorex Losses Small at Mid-Continet Plant	Aug. 1,	16-B
Oxidation Stability of Lubricating Oils and a New Oxidation Test, by Boyd Guthrie, Ralph Higgins, and Donald Moran, Part 1	Aug. 8,	22
Part 2	Aug. 15,	22
New Conception of Grease Structure	Aug. 15,	26
Exhaustive Study of Lubricating Grease by English Technologist	Aug. 22,	21
Meaning of Terms Counter-Current and Double in Solvent Extraction	Aug. 29,	23
First Large S-N Dewaxing Plant Operating at Port Jerome	Sept. 5,	21
Composition, Properties and Uses of Modern Lubricating Greases, by C. C. Wilch	Sept. 5,	26
First Commercial Duo-Sol Process Unit Placed In Operation, by Arch L. Foster	Oct. 3,	35
Automotive Lubrication and Lubricants, by H. C. Mougey	Oct. 24,	23
Industrial Lubrication and Lubricants, by O. L. Maag	Oct. 24,	27
Solvent Refined Oils Help Solve Some Engine Design Difficulties, by Arch L. Foster	Nov. 7,	45
High Viscosity Index Blended into New Crankcase Oils	Nov. 14,	30

Lubricants and Lubrication

Title	Issue	Page
E. P. Lubes Must Have Chemical Reactivity to Give Service	Nov. 14,	39
Continuous Blending of Lubricating Oil Components with Automixer	Nov. 28,	17
Little Change in Engine, Lubricants in 1935 Cars, by Arch L. Foster	Dec. 19,	25

N. P. N. SEMI-ANNUAL INDEX

Little Change in Engine, Lubricants in 1935 Cars, by Arch L. Foster	Dec. 19,	25

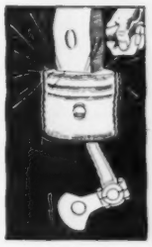
EVEN AN *Organ Grinder* KNOWS THE SECRET

WHILE ordinary folks don't realize it, there is art even in the grinding of a hand organ. If the crank is turned with an irregular, spasmodic movement, the music will have an irregular, spasmodic quality. That is why the true artist of the organ turns with a firm, full, sustained motion.

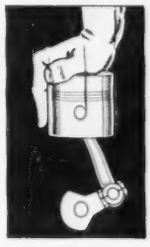
To the motorist, the sweetest of "music" is the smoothness of a sweet-running motor. And such music, also, depends on the turn of a crank—on the manner in which the crankshaft revolves.

When gasoline explodes with a sudden BANG, it transmits to the crankshaft a jerky and spasmodic movement.

But when gasoline is engineered to explode with TIMED progression, it imparts to the piston the full, sustained THRUST which is the secret of smooth performance.



The "hammer blow" means spasmodic performance, high gasoline consumption, large repair bills.



The sustained THRUST means smooth performance, lower gasoline consumption, lower maintenance cost.

In 1934 scores of jobbers and hundreds of dealers have found in MARATHON "Timed" Gasoline the source of steady repeat business they had long been looking for. For a similar experience in 1935, we invite you to write or wire for details.

MARATHON OIL COMPANY . . . TULSA, OKLA.

Sioux City Little Rock Fort Worth

MARATHON PRODUCTS "BEST IN THE LONG RUN"

MARATHON *Timed* Gasoline

N. P. N. Semi-Annual Index of Technical and Semi-Technical Refinery Articles

Title	Issue	Page
Classification of Winter Oils Shown by New Chart, by Richard Grosholz....	Dec. 19,	32
Finest Lubricants Required for Diesels	Dec. 19,	37

Motor and Other Fuels

(See also Detonation, Diesel, and Specification)

Exhaust Gas Analysis, by W. H. Paul and G. W. Gleeson		
Correlations, Part 1	Sept. 26,	21
Interpretation, Part 2	Oct. 3,	42
Application, Part 3	Oct. 10,	35
Gasoline Variations Studied	Oct. 17,	36
N. G. A. A. to Study Volatility Value in Broad Research Program.....	Nov. 7,	72
100 Octane Fuel Now Made on Commercial Scale	Nov. 14,	46
Propane Used as Fuel and Refrigerant in Truck Transportation	Nov. 21,	32
Propane and Butane Limitations as Motor Fuels Disclosed	Nov. 21,	35

Plant Control and Modernization

Port Jerome Refinery Processes Several Crudes for Complete Line of Products	Aug. 15,	18
Valvoline Completes Modernization, Building Three Still Units	Aug. 29,	25
Michigan Refinery Designed for Versatility, by John W. Thompson	Sept. 12,	26
Control Instruments for Refinery Operation Show Ingenuity of Instrument Engineers	Oct. 17,	30
Economics, Science and Engineering Must be Correlated in Modern Refining, by Arch L. Foster	Nov. 7,	25
Many Process Problems Solved by New Equipment Developments, by Arch L. Foster	Nov. 7,	58
Automatic Control Devices Assure Power Continuity at the Refinery, by John W. Thompson	Nov. 28,	22
Quick Changes in Stream Specifications is Possible in New United Refining Unit	Dec. 19,	29

Refining, General

(See also Specifications and Lubricants)

Fire and Safety Hazards in Refineries Listed	July 4,	31
Refinery Promotions Best Made by Examination System	July 11,	25
Development of Alloy Steels for Oil Refinery Service, by W. H. Wiewel and R. L. Wilson	Aug. 1,	17
"Creep" Study of Metals in Refining to be Enlarged	Aug. 8,	8
Nomographic Methods for Solution of Refinery Heat Transfer Problems, by M. G. Van Voorhis	Aug. 22,	24
Heat Transfer Coefficients Studied	Aug. 22,	30
Greater Recovery of Fullers Earth at Pennsylvania Refinery	Aug. 29,	30
Wasatch Combines Reforming with Skimming in Utah Refinery	Sept. 5,	22
Petroleum as Chemical Raw Material Discussed at Chemists' Meet, by Arch L. Foster	Sept. 19,	28-B
Plumbite Sweetening Proved Harmful to Gasoline	Sept. 19,	28-F
Michigan as a Refining District, by Arch L. Foster	Sept. 19,	29
Addition of Nitrogen Improves Structure of Alloy Steel	Oct. 10,	38
New York Producers Solve Outlet Problem by Building Their Own Refinery, by John W. Thompson	Oct. 31,	21
Application of Pearlitic Alloy Steels to Specific Refinery Problems, by A. E. White, C. L. Clark, and R. L. Wilson	Nov. 7,	31
Increase in Uses of Anhydrous Ammonia in Refining Practice, by Benjamin T. Brooks	Nov. 7,	53
Low-Nickel Steel Proved Best for Low Temperature Equipment, by R. K. Hopkins	Nov. 7,	64
New Gravity Separator Maintains Quality of Filter Clays, by A. L. Shepard	Nov. 14,	34
Experimental Testing of Low-Temperature Equipment for Dewaxing Processes, by R. K. Hopkins	Dec. 5,	21

Specifications and Test Methods

Color Reaction of Beta-Mineral Oil Sulfonic Acids Discovered	July 18,	26
Simplified Diesel Fuel Performance Index Proposed	July 25,	36
Helium Test Method Reference	Aug. 22,	36
Dew Point of Natural Gases, Method for Measuring Outlined	Aug. 22,	36
Federal Turbine, Diesel Engine, and Refrigerating Machine Oil Specifications Submitted	Sept. 12,	30
Storage Stability Tests Based on Induction Period	Sept. 19,	28-D
Evaluation of Boiling Points by High Vacuum Improved	Sept. 19,	28-H
Efficient Tests for Absorption Oil Deterioration Selected	Sept. 19,	28-H
New Method for Rating Oil Viscosity Characteristics	Sept. 26,	24
Corrections	Nov. 21,	34
Changes Recommended (Adopted in Dec.) in Commercial Standards for Fuel Oils	Oct. 24,	36
Refinery Gases Analyzed by Distillation	Nov. 7,	56
New Master Viscosity Standard Tubes at Bureau of Standards	Nov. 14,	32
Viscosity and Gravity Found to Show Diesel Fuel Ignition Traits	Nov. 21,	30
Pour Test Machine Maintains Four Temperatures	Dec. 12,	29
New Cutting Oil Specifications	Dec. 12,	29

General Information

Notes on Leaks and Air Elimination in Gasoline Dispensing Systems, by E. W. Weaver	July 4,	32
High Pressures Aid Oxidation in By-product Manufacture	Aug. 29,	30
Petroleum Research to be Chemists' "Happy Hunting Ground," by A. L. Foster	Sept. 12,	23
East Texas Field Pressures Discussed by Engineers	Oct. 17,	24-A
Table of Anti-Freeze Compounds for Various Temperatures	Oct. 17,	38
Petroleum Products for the Automotive Industry, A. L. Clayden	Nov. 7,	40
Modern Cutting Oil Characteristics Should be Better Known	Nov. 7,	44
Underground System for Reducing Evaporation Losses at Bulk Plants.....	Nov. 28,	28
Horticultural Spray Materials from Petroleum Products	Dec. 19,	37
Lubricants' Cancer Potency Told by Physical Traits	Dec. 19,	61

Ready Soon!

OIL PRICE HANDBOOK For 1934

"Send the OIL PRICE HANDBOOK for 1934 the minute it is off the press. It is one of the greatest time-and-money savers in our organization."

Requests like these coming in almost daily prompt this advance announcement of our 11th edition of the OIL PRICE HANDBOOK.

Orders will be filled in the order of their receipt. If you wish one of the first copies off the press, send your order in NOW!

The 1934 OIL PRICE HANDBOOK is the most complete record of oil prices ever published for the industry—

Refinery, tank wagon, crude and export markets—conveniently indexed—a Refinery Directory by states giving plant location, daily crude capacity, cracking process used, etc.

First come, first served! If you want one of the first copies off the press, send your order in TODAY!

Clip and Mail

NATIONAL PETROLEUM NEWS
Penton Bldg., Cleveland, Ohio

Send 1934 OIL PRICE HANDBOOK and Refinery Directory as soon as it is off the press. Attached is check for $10.00. (On order of 5 copies special discount of 5%; 10 or more copies 10% discount; 50 or more copies 20%, payable in advance).
